

A **Message** From The President

Energy has emerged as a top budgetary and reputational concern for our clients, providing us an excellent opportunity to introduce new value-added services that will simplify the lives and improve the bottom lines of our client organizations. Our partnership with Transparent Energy (TE) will bring the power of online auctions, backed by the energy expertise and client-service skills of their team, to clients interested in saving money on energy, becoming more sustainable and protecting themselves from energy-market volatility.

*- Charles J Miller,
President & CEO of NgenX*

ABOUT TRANSPARENT ENERGY

Our mission is to simplify the complicated energy procurement process, acting as an advocate and advisor for our clients to help them get the energy they need at the lowest available rates, in the most efficient manner possible.

We use a proprietary platform for energy procurement auctions. These real-time events create a hypercompetitive environment and increase efficiencies in bidding, price discovery, and auditing that traditional paper-based procurement auctions cannot match.

Using our proprietary software for transacting electricity, natural gas, and green power, we help clients lower their total energy spend by leveraging a superior process and utilizing best in class planning which includes risk management, sourcing, sustainability, maximization of energy incentives, as well as continued energy management monitoring.

NgenX CLIENT BENEFITS

 **Market Timing:** TE reviews contracts well in advance of existing energy contract expiration, allowing you to get ahead of market volatility.

 **Large Supplier Network:** 200%-300% more suppliers compete for clients' business than with any other energy procurement process.

 **Eliminated Risk Premiums:** TE's 99% auction day close rate eliminates supplier risk premiums for clients.

 **No-Risk to Clients:** There are no upfront costs to clients. If you are not completely satisfied with the auction price there is no obligation to contract.

TRANSPARENT ENERGY

Procurement Process Experts

Transparent Energy uses a live reverse auction platform that helps clients significantly lower their total energy spend. To date, TE has transacted more than \$1.5B in both green and brown power and reduced clients' budgets by more than \$110MM.

WHY AUCTIONS WORK

| 150 Approved Suppliers | Efficient & Transparent Process | Reverse Online Auction | RFP Customization & Arrangement |
|--|--|--|---|
| <p>Competition is the key component in successful energy procurement. With an ever-increasing number of new supplier participants, their auctions ensure that the client receives bids from ALL available suppliers, providing a more holistic exposure to available market rates.</p> | <p>Energy is an extremely volatile market which leads to highly fluctuating prices. The time spent between receiving a price and contracting that price may result in an unnecessary 2-5% rate change! To avoid this, TE's process ensures that contracts are executed the day of the auction.</p> | <p>TE auctions are designed to compress suppliers' margins to their lowest price. Participants can see the lowest bids from their competitors in real time – enabling them to adjust their bidding strategy as necessary. 99% of TE Auctions close the day of auction.</p> | <p>Price discovery is vital to establishing the correct product and term length for your business. TE's platform enables clients to test different products, including green energy, terms & pricing structures. This provides insight into real-time pricing options and is customizable in order to meet YOUR energy procurement goals.</p> |
